Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. No interviews were conducted during the survey. A fishing pole and roads to the creek were observed during the survey.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the median depth criterion at 1 of the 4 sites evaluated and the maximum depth criterion at 1 of the 4 sites, and was close at one other. Due to meeting the depth criteria, the committee recommends the WBCR use designation be retained. Due to evidence of secondary contact (fishing pole, etc.), the committee recommends Secondary Contact Recreation be assigned.
